

Think Like a Marketing Strategist 🚀

Marketing isn't about posting content randomly — it's about making **deliberate decisions**: who you're talking to, where you should show up, what you should say, and how you respond when the unexpected happens.

This simulator walks you through the real thought process professional marketers use — for a business, a client, or even **yourself** as a personal brand. Along the way, you'll learn how to ask AI tools like Claude the right questions to think this way on your own.

[Start the Simulation →](#)

Choose Your Path

Why this matters: every marketing decision starts with knowing **whose** brand you're building. The strategy process is the same whether it's a business or a person — only the details change.

Use My Own Business

Bring your real business or idea and build a strategy for it.

Build My Personal Brand

No business? Use your name, expertise, and story as the brand.

A New Client Has Arrived

We'll randomly generate a business for you to strategize for.

Growth Report: Riley

Here's a strategist's summary of the decisions made throughout this simulation.

Audience Understanding

People who want to learn about or work in software engineering

Platform Strategy

YouTube, Instagram, LinkedIn

Content Strategy

Thought Leadership, Audience Education, Community Engagement

Growth Potential

High — strategic choices support sustainable growth.

Best Decision

Choosing "Respond thoughtfully and stay on-topic" during the unexpected event.

Biggest Mistake Risk

Spreading focus across too many platforms too soon.

Three Marketing Lessons

- 1 Authenticity beats perfection — audiences trust real stories more than polished ones.
- 2 Consistency compounds — showing up regularly in your niche builds authority over time.
- 3 Niche clarity attracts the right audience — trying to appeal to everyone attracts no one.

HOW TO ASK CLAUDE — TURNING THIS INTO A REAL PLAN

Act as a personal branding strategist. Based on this simulation — audience: People who want to learn about or work in software engineering, platforms: YouTube, Instagram, LinkedIn, pillars: Thought Leadership, Audience Education, Community Engagement — write me a real 30-day action plan I can start using this week for Riley.

 Try Again With a New Brand

30-Day Marketing Roadmap

Personal Brand: Riley — Software Engineering

Week 1: Define Your POV & Optimize Your Profile

Goal: Nail down your unique point of view in software engineering. Make sure LinkedIn, YouTube, and Instagram clearly say who you help and how. Rewrite bio/headline, clean up photos and banners for consistency, and post one intro piece explaining what's coming next.

Focus: Profile setup, positioning, first post

Week 2: Introduce Yourself Through Story

Goal: Focus on Personal Story content to humanize your expertise — share your background, a turning point in your engineering journey, or a lesson from a failure. This builds relatability before you start asserting authority.

Focus: Relatability, background, early trust-building

Week 3: Establish Authority

Goal: Lean into Thought Leadership — share opinions, frameworks, or takes on debated topics in software engineering. This is where you start being seen as someone with a distinct point of view, not just someone documenting their journey.

Focus: Opinions, frameworks, distinct point of view

Week 4: Engage & Expand

Goal: Mix in Audience Education content (tips, explainers, breakdowns) and shift more energy into Community Engagement — replying to comments, engaging with others' posts, and starting real conversations. This turns passive followers into an actual audience.

Focus: Education content, replies, real conversations

Ongoing Weekly Rhythm

LinkedIn 3-4x/wk · Instagram 2-3x/wk · YouTube 1 video/1-2 wks · Daily 10-15 min engagement
