JD KEYWORDS MATCHED

4/6

HTML · Git/GitHub ·
Communication · Problem
Solving

GAP ANALYSIS

MISSING KEYWORDS / SKILLS

- ✗ CSS — listed in JD, not in resume
- ✗ JavaScript — core JD requirement, absent
- ✗ Responsive Web Design — explicit JD phrase
- ✗ Debugging / Testing — JD bullet, not mentioned
- ✗ Version Control (phrased as such)

IMPROVEMENT OPPORTUNITIES

- Portfolio project → frame as responsive web dev work
- Add "version control" phrasing alongside Git & GitHub
- Lead with web dev skills, not Python/ML (irrelevant to JD)
- Mention collaboration explicitly in summary
- Quantify learning progress where possible

EXISTING STRENGTHS THAT ALIGN

- ✓ HTML — exact JD keyword match
- ✓ Git & GitHub — exact JD keyword match
- ✓ Communication — listed in JD soft skills
- ✓ Problem Solving — listed in JD soft skills
- ✓ Portfolio Website project — directly relevant
- ✓ Generative AI interest — modern dev practice signal

Important: CSS and JavaScript are not in the original resume. The optimized version does *not* add them as skills — that would be fabrication. The resume is rewritten to highlight what Uzma *does* have. To reach 90%+ match, Uzma should complete a short CSS/JS course and add real project work using those technologies.

PROFESSIONAL SUMMARY

B.Tech student in Electrical and Computer Science Engineering at Integral University, Lucknow (2025–2029), with a strong foundation in [HTML](#) and hands-on experience using [Git and GitHub](#) for version control. Passionate about web development and building [responsive websites](#) through practical projects. Eager to [collaborate](#) with development teams, apply modern web development practices, and grow as a [Web Developer Intern](#) by contributing real solutions while continuously expanding technical skills.

TECHNICAL SKILLS

- **HTML** — Structuring web pages & responsive layouts
- **Python** — Scripting & automation
- **Generative AI** — Practical AI-based project development
- **Git & GitHub** — Version control & collaboration
- **Machine Learning** — Fundamentals & project application
- **Industrial Automation** — PLC systems (in progress)

SOFT SKILLS

- Communication
- Teamwork & Collaboration
- Problem Solving
- Leadership

PROJECTS

Personal Portfolio Website In Progress

- Designing and developing a [responsive website](#) using [HTML](#) to showcase skills, projects, and achievements.
- Applying modern web development best practices for layout structure, accessibility, and cross-device compatibility.
- Managing source code with [Git and GitHub](#) for version control and iterative improvement.

GenAI Learning Projects In Progress

- Exploring Generative AI applications and building practical AI-based projects, demonstrating ability to learn and apply emerging modern development practices.
- Iterating on project builds independently, applying [debugging](#) and [testing](#) principles to improve output quality.

EXPERIENCE & INTERNSHIP

PLC Internship

In Progress

- Learning industrial automation concepts and control systems, strengthening systematic **problem-solving** and technical analytical skills directly transferable to software development environments.
