JOB SEARCH CRITERIA

Uzma — ML/AI Intern

Target profile for internships and entry-level roles in AI/ML

TARGET JOB TITLES

- ML/AI Intern
- Generative AI Intern
- Python Developer Intern
- AI Engineer Intern
- Data Science Intern

PREFERRED COMPANY TYPES

- Startups
- AI-focused Firms
- EdTech Companies
- IT Services & Consulting
- Product Companies

WORK ARRANGEMENT

- Remote
Preferred
- Hybrid
Open to
- Onsite
India-based only

COMPENSATION & REGENCY

Salary (Internship)	Stipend / Unpaid OK	Primary Location	Remote / Lucknow
Salary (Full-time)	₹3–5 LPA	Secondary	Bengaluru, Hyderabad
Posting Recency	Within 3 days	Relocation	Open, case-by-case

EXCLUSIONS

- Pure Sales / BPO roles
- MLM / Commission-only
- Unpaid roles requiring relocation

ADDITIONAL PREFERENCES

Prioritize roles offering **mentorship and real project ownership** for early-career developers, exposure to **LLMs, Python, and GenAI tools**, and a clear path toward **full-time conversion** or strong letter of recommendation.

MARKET DEMAND INSIGHTS

Entry-level AI/ML demand in India is concentrated in **internship and trainee roles**, many offering structured mentorship in exchange for low or no stipend — a common trade-off for portfolio-building.

Remote roles dominate the fresher segment. Demand for **GenAI + LLM skills** has surged — even interns are now expected to have worked with OpenAI APIs or Hugging Face. Python + Git remain non-negotiable baseline requirements.

RECOMMENDATIONS TO IMPROVE INTERVIEW CHANCES

- Build a **GenAI project** using OpenAI API or Hugging Face (e.g. a simple AI chatbot or summariser) and publish on GitHub with a clean README.
- Learn **Prompt Engineering basics** — DeepLearning.AI's free short course is the fastest path.
- Add **Pandas + NumPy** to your toolkit with one data analysis project on GitHub.
- Strengthen your **GitHub profile** — pin 3–4 repos with proper READMEs; recruiters check this.
- Pursue a quick certification — **Google ML Crash Course** or Andrew Ng's ML Specialization would significantly boost credibility.
- Prioritize applying to **OrbitXII** first — it's the most fresher-friendly and aligns with your current GenAI focus.

OVERALL FIT ASSESSMENT

Fit Level: Strong for Internships · Moderate for Full-Time Roles

Your current profile (**Python, GenAI, Git, HTML**) is well-matched to entry-level internship postings, especially those explicitly designed for freshers and students. For full-time roles, compensation expectations (₹3–5 LPA) are realistic but currently **contingent on closing the LLM/GenAI project gap** — most full-time postings expect at least one demonstrated AI project. **Recommended path:** target 1–2 remote internships now (OrbitXII, Adsquaretech) to build portfolio, then re-run this search in 3–6 months for stronger full-time matches.
