DIGITAL TWIN PROFILE

ALL ESTIMATES - INFERRED FROM SERVICE LIST ONLY

What platforms collectively infer about you. These are probabilistic estimates — never certainties.

DEMOGRAPHICS

- Age 16–28 est.
- Mobile-first user
- Digitally active
- India region likely
- English speaker est.

INTERESTS & LIFESTYLE

- Gaming (PUBG, Roblox)
- Music consumer
- Video content
- Social media active
- Online shopping

SPENDING SIGNALS

- Digital payments user
- E-commerce active
- In-app purchases likely
- Price-sensitive shopper est.

COMMUNICATION PATTERNS

- Group chat user
- Voice & video likely
- Multi-platform messaging

WOW INSIGHTS

You Have 6 Bosses

Six corporations hold data about your payments, face, voice, location, and conversations — often simultaneously through a single session.

The Fingerprint Web

Google, Meta, and ByteDance all operate ad networks that can cross-identify you across apps you don't even realize are connected.

Your Digital Twin Exists

Advertisers likely hold an estimated profile with 500–1,000 inferred attributes based on just these 15 services — age, income bracket, mood, and daily routines.

Geopolitical Exposure

TikTok's Chinese parent ByteDance and Krafton (PUBG) are subject to non-Western data jurisdictions, creating potential state-level data risk.

Financial Triangulation

Google Pay + Amazon + Meesho together could allow a third party to triangulate your estimated income range and spending categories.

Facial Data Collection

Snapchat AR filters, Instagram's face effects, and Google Photos smart recognition likely build biometric-adjacent photo models tied to your account.

PRIVACY IMPROVEMENT PLAN

Privacy Action Simulator

Toggle actions to see how your Privacy Score could improve. Changes reflect estimated impact only.

Enable App Tracking Transparency on iOS

Limits cross-app tracking by Instagram, TikTok, Snapchat

+8 pts est.

Delete TikTok or restrict its permissions

Removes ByteDance data jurisdiction risk and device sensor access

+7 pts est.

Pause Google Activity Controls

Disable Web & App Activity, Location History in Google Account settings

+6 pts est.

Switch to DuckDuckGo for daily searches

Eliminates search-intent profiling from Google's ad ecosystem

+5 pts est.

Audit & revoke unused app permissions

Location, microphone, contacts — review each app in phone settings

+5 pts est.

FINAL VERDICT

You're a High-Value Digital Profile

With 15 services spanning social media, payments, gaming, messaging, and search — across 6 parent companies — your estimated digital footprint is extensive. Google and Meta alone can cross-reference your identity, location, financial signals, and social graph. The addition of TikTok introduces geopolitical data risk. The good news: you have meaningful leverage. Several high-impact privacy improvements require less than five minutes each.
